

# AUX ENGINE AND SAFETY SYSTEM

PRECISION IN POWER, PRIORITY IN SAFETY: EMBARK WITH ASSURANCE USING OUR AUX ENGINE SYSTEM

Maximize ship safety and performance with our cost-effective Aux Engine and Safety System. Designed for reliability in maritime conditions, it seamlessly combines efficiency and protection on the open seas

## WE OFFER

## ENHANCED EFFICIENCY RELIABILITY AND PEACE OF MIND

### FEATURES

- Ensuring optimum performance and maneuverability
- Utmost precision and safety
- Compliance with environmental standards
- Reducing emissions to preventing hazardous environment
- Enabling predictive analysis and monitoring
- High accuracy and reliability
- Optimizing fuel consumption
- Minimizing maintenance costs

### COMPONENTS

- One set of PLC for safety
- 2 PR indicators for local reading
- One 7" or 15" touch screen located on the Engine local panel
- processing all the data from the existing sensors in the Engine Room
